ART UNIT	PAPER NUMBER		2173	
MAIL DATE	DELIVERY MODE		10/11/2007	PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b>	<b>Applicant(s)</b>
	10/749,421	JASPERS ET AL.
	<b>Examiner</b>	<b>Art Unit</b>
	Haoshian Shih	2173

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 01 August 2007.
- 2a) This action is FINAL.                    2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) Claim(s) 1,3,4,6-8,10-20 and 22-27 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) Claim(s) \_\_\_\_\_ is/are allowed.
- 6) Claim(s) 1,3,4,6-8,10-20 and 22-27 is/are rejected.
- 7) Claim(s) \_\_\_\_\_ is/are objected to.
- 8) Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on \_\_\_\_\_ is/are: a) accepted or b) objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
  - a) All    b) Some \* c) None of:
    1. Certified copies of the priority documents have been received.
    2. Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
    3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

## **DETAILED ACTION**

1. Claims 1, 3-4, 6-8, 10-20 and 22-27 are pending in this application and have been examined in response to application amendment filed on 08/01/2007.
2. Claims 2, 5, 9 and 21 are canceled without prejudice.
3. Claims 26 and 27 are new.

### ***Claim Objections***

4. Claims 3, 6-8 are objected to because of the following informalities: claimed subject matters are depended on canceled claims. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
6. Claim 27 recites the limitation "languages". It is not clear if the phrase "languages" refers to nature languages (e.g., English, French, etc.) or programming languages (e.g., C, Java, etc.) or markup languages (e.g., HTML, XML, etc.) There is insufficient antecedent basis for this limitation in the claim.

### ***Claim Rejections - 35 USC § 102***

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2173

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

**8. Claims 1, 3-4, 6-8, 10-20 and 22-26 are rejected under 35 U.S.C. 102(e) as being unpatentable by Giljum et al. (Giljum, US 6,745,238 B1).**

As to **INDEPENDENT** claim 1, Giljum discloses a method comprising: presenting a user interface adapted to allow a user to configure parameters relating to a set of predefined components for a web environment (fig.12; col.13, lines 52-55; Item wizard allows the user to define and add new web components), the set of predefined components comprising a library of components that can be selectively enabled, disabled, and customized (col.2, lines 15-16; col.8, lines 14-16; col.9, lines 23-35; col.13, lines 65-67; the content contributor manages the components).

receiving data defining the parameters for the web environment (fig.13, fig.14; col.14, lines 24-26; the user enters item definition); and

automatically generating at least a portion of the web environment based on the received data, with the generated web environment including components specified by the parameters (fig.15; col.14, lines 47-49; an item is added based on the user inputs).

Art Unit: 2173

9. As to claim 3, discloses the form comprises a plurality of entry fields, with each entry field corresponding to one of the predefined components (fig.13, fig.14).

As to claim 16, see rationale addressed in the rejection of claim 3 above.

10. As to claim 4, Giljum discloses the generated web environment is based on a template defining a presentation format for the generated web environment (col.11, lines 56-57, lines 63-67).

11. As to claim 6, Giljum discloses the generated web environment comprises a plurality of web pages, the method further comprising: receiving a request to publish content in at least one of the plurality of web pages presenting (col.13, lines 14-16; "add sub item"), in response to the request to publish content, a content definition user interface adapted to receive an identification of content (fig.13); and publishing the identified content in accordance with a predefined presentation format (col.11, lines 56-58; style template maintains the overall look and feel of the web environment).

12. As to claims 7, Giljum discloses receiving data corresponding to a request to navigate to a particular location within the web environment, wherein the request to publish content is received in connection with a display of the particular location on a user interface and the identified content is published at the particular location (fig.23; col.16, lines 41-45).

Art Unit: 2173

13. As to claim 8, Giljum discloses the particular location comprises a folder within a folder hierarchy displayed on the user interface, with the folder hierarchy corresponding to a logical structure of the web environment (col. 4, lines 6-7, lines 15-20; col.5 lines 18-20 the web site is organized as parent folders and child folders).

14. As to claim 10, Giljum discloses the predefined components comprise web page components, with each web page component defining a presentation format for data on a web page (col.5, lines 21-25; "attributes").

15. As to claim 11, see rationale addressed in the rejection of claim 6 above.

16. As to claim 12, Giljum discloses the content includes at least one link to a web page (col.6, lines 6-8; "links").

17. As to claim 13, Giljum discloses: receiving a request to modify a logical structure of the web environment; modifying the logical structure of the web environment in accordance with the request to modify the logical structure (col.15, lines 55-60; user modifies the logical structure by adding a folder); and updating the at least one link in accordance with the modified logical structure (col.16, lines 5-9; updates are reflected when the user clicks the "done" icon).

As to **INDEPENDENT** claim 14, see rationale addressed in the rejection of claim 1 above.

18. As to claim 15, Giljum discloses the presented user interface comprises a form adapted to allow a user to configure the parameters (fig.12; col.13, lines 52-55).
19. As to claim 16, see rationale addressed in the rejection of claim 3 above.
20. As to claim 17, see rationale addressed in the rejection of claim 4 above.
21. As to claim 18, see rationale addressed in the rejection of claim 6 above.
22. As to claim 19, see rationale addressed in the rejection of claim 7 above.
23. As to claim 20, see rationale addressed in the rejection of claim 8 above.
24. As to claim 22, see rationale addressed in the rejection of claim 10 above.
25. As to claim 23, see rationale addressed in the rejection of claim 6 above.
26. As to claim 24, see rationale addressed in the rejection of claim 12 above.

Art Unit: 2173

27. As to claim 25, see rationale addressed in the rejection of claim 13 above.
28. As to claim 26, Giljum discloses wherein the templates include templates for at least one of different countries, different organizational sites, intranet sites, extranet sites, or internet sites (fig.35, "select style"; col.11, lines 63-67, a user can select or create a custom style template from the web site database).

***Claim Rejections - 35 USC § 103***

29. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

30. **Claim 27 is rejected under 35 U.S.C. 103(a) as being unpatentable over Giljum and Sumitomo (US 7,234,110 B2).**

31. As to claim 27, Giljum discloses wherein the library of components include predefined components. Giljum does not disclose different language components to allow a user to selectively switch among different languages for presentation in generated web environment.

In the same field of endeavor, Sumitomo discloses different language components to allow a user to selectively switch among different languages for presentation in generated web environment (col.4, lines 51-65).

It would have been obvious to one of ordinary skill in the art, having the teaching of Giljum and Sumitomo before him at the time the invention was made, to modify the web designer taught by Giljum to include multilingual pack taught by Sumitomo with the motivation being to allow an appropriate language format responsive to the user's need (Sumitomo, col.2, lines 25-30).

***Response to Arguments***

32. Applicant's arguments filed on 08/01/2007 have been fully considered but they are not persuasive.

33. Applicant argues that Giljum does not disclose the set of predefined components comprising a library of components that can be selectively enabled, disabled, and customized.

In response to applicant's argument, Giljum discloses a set of predefined items that are stored in a web site database that can be manipulated (col.2, lines 15-16; col.8, lines 14-16; col.9, lines 23-35; col.13, lines 65-67; the content contributor manages the components).

Art Unit: 2173

***Conclusion***

34. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

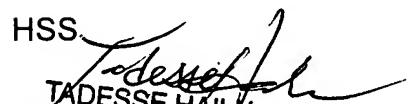

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Haoshian Shih whose telephone number is (571) 270-1257. The examiner can normally be reached on m-f 0730-1700.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Cabeca can be reached on (571) 272-4048. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
